

Box plot comparing BULK and LRC methods. The y-axis represents a metric from 0 to 100. The BULK group (red box) has a median around 55, while the LRC group (cyan box) has a median around 65. Individual data points are overlaid on the boxes. A p-value of $p < 0.001$ *** is indicated above the LRC group.

Group	Median	Q1	Q3	Min	Max	Outliers
BULK	55	45	65	25	75	25, 30, 40, 45, 50, 55, 60, 65, 70, 75, 80, 85, 90, 95, 100
LRC	65	55	75	45	85	40, 45, 50, 55, 60, 65, 70, 75, 80, 85, 90, 95, 100

$p < 0.001$ ***
